

Gluten Intolerance Education Conference

November 2-3, 2007

**Courtyard by Marriott
1080 28th Ave. So,
Moorhead, MN 56560**

Sponsored by:

FEATURING GLOBAL AND NATIONAL EXPERTS

Stefano Guandalini, MD
*Professor of Pediatrics, Director, University of
Chicago Celiac Disease Program*

Dr. Guandalini is an internationally recognized expert on celiac disease. He is also known for his expertise in the research and treatment of other diarrheal diseases in children. Dr. Guandalini's clinical and research efforts have greatly influenced the way celiac disease is diagnosed and treated today. His guidelines are now used worldwide for the diagnosis of celiac disease in both children and adults.

Anne Roland Lee, MEd, RD, CDN
*Nutritionist, Celiac Disease Center
Columbia University, NYC*

Anne Lee is involved in patient care and research, as well as pursuing a doctoral degree. Her research has resulted in published articles on the effect of a gluten-free diet on the quality of life, and the economic impact of a gluten free diet. She has authored a chapter in a nutrition text and co-authored a chapter in a gastroenterology text on celiac disease. Anne has developed numerous educational materials. She also started Club Celiac, a support group for teens with celiac disease.

Ted Malahias, DDS
*Bridgeworks Family Dental Center
Groton, Connecticut*

Dr. Malahias graduated from the State University of New York at Stony Brook School of Dental Medicine in 1990. In 2003 he became affiliated with the Celiac Center at Columbia University in New York, studying the effect of Celiac disease on dental enamel. He has a private practice in Groton Connecticut.

Cynthia Kupper, RD, CD
*Executive Director,
Gluten Intolerance Group of North America
Auburn, WA*

Cynthia Kupper is the Executive Director of Gluten Intolerance Group of North America, including the Gluten-Free Certification Organization and Gluten-Free Restaurant Awareness Program. She is an international speaker to the health care community and consultant to food manufacturers and restaurants. She has been a Diabetes Educator for 10 years with St. Joseph Health Care.

Celiac disease is an inherited autoimmune disorder that affects the digestive process of the small intestine. When a person who has celiac disease consumes gluten, a protein found in wheat, rye, and barley, the individual's immune system responds by attacking the small intestine and inhibiting the absorption of important nutrients into the body.

Undiagnosed celiac patients are at greater risk of contracting cancer, chronic neurological disorders, osteoporosis, anemia and other serious illnesses. It is important for the U.S. physicians to know the prevalence of celiac disease and to be able to recognize it in their patients. It is also important that the general public become more aware of celiac disease. Public awareness and prevalence research will go hand-in-hand to encourage a more educated population and create a more supportive environment for celiac patients in restaurants and public venues.

This conference is for celiacs, medical personnel, dietitians, school personnel, chefs, restaurant managers, and anyone interested in learning the latest developments about Gluten Intolerance, Celiac Disease and related autoimmune disorders

Note: All speakers presented at the XII International Celiac Disease Symposium hosted by Columbia University, NYC in November 2006

Who Should Attend?

- * Celiacs, gluten intolerant people & family members
- * People with wheat allergies/sensitivities
- * Health Care Providers in all fields
- * Dietitians
- * Chefs & Food Service Personnel
- * Day care providers
- * School nurses, teachers, counselors
